Bourdieu and Culture-Derek Robbins 2000-02-11 An accessible and readable introduction to Bourdieu's work, this book places him in intellectual and historical context, and shows how Bourdieu is best understood as a cultural analyst. It traces his development from his early work on education to his relationship to cultural sociology and cultural studies. The book also gives detailed examples, drawn from Bourdieu's own work, to show how he makes sense of contemporary culture. Robbins guides the reader authoritatively through Bourdieu's wide-ranging body of theoretical and analytical work and offers a framework within which the most recent aspects of that work can be understood.

Les sciences humaines dans le centre de l'art-CORDONNIER Sarah 2012-09-24 Cet ouvrage propose de décrypter le rôle des sciences humaines dans l'art contemporain au fil de son développement et de son institutionnalisation en France. Cette approche communicationnelle s'intéresse aussi bien aux pratiques qu'aux discours, aux dispositifs (comme l'exposition) qu'aux représentations (en particulier des sciences). Comment observer les sciences humaines dans le champ artistique, alors que leur réception, leurs réappropriations, ne sont pas visibles de manière immédiate ? Comment rendre compte d'un usage collectif de ces savoirs et, donc, les situer dans des règles et normes partagées par les acteurs de l'art contemporain ? Comment repérer et analyser les manières différenciées d'y recourir dans ce cadre commun ? Par l'observation et l'examen détaillé des centres d'art et des expositions d'art contemporain, Les sciences humaines dans le centre d'art vise à éclairer la circulation sociale des savoirs et les manières de l'étudier.

Constructing a Sociology of Translation-Michaela Wolf 2007-10-25 The view of translation as a socially regulated activity has opened up a broad field of research in the last few years. This volume deals with central questions of the new domain and aims to contribute to the conceptualisation of a general sociology of translation.

Interdisciplinary in approach, it discusses the role of major representatives of sociology like Pierre Bourdieu, Bruno Latour, Bernard Lahire, Anthony Giddens or Niklas Luhmann in establishing a theoretical framework for a sociology of translation. Drawing on methodologies from sociology and integrating them into translation studies, the book questions some of the established categories in this discipline and calls for a redefinition of long-assumed principles. The contributions show the social involvement of translation in various fields and focus especially on the translator's position in an emerging sociology of translation, Bourdieu's influence in conceptualising this new sub-discipline, methodological questions and a sociologically oriented meta-discussion of translation studies.

Intersubjectivity in Economics-Edward Fullbrook 2003-09-02 Traditional economics treats the defining subjective properties of economic agents (tastes, preferences, demands, goals and perceptions) as if they are determined independently of individual and collective relations with other agents. This collection of essays reflects the increasingly common view that economics cannot continue to disregard all economic phenomena inconsistent with this conception. The volume is especially concerned with the idea of intersubjective influences on market outcomes. A team of expert international contributors have been brought together to address the question of intersubjectivity from a variety of perspectives. Using methods of description and analysis they explore the structures and effects of concrete interdependencies between individual subjectivities engaged in economic activity, and develop conceptual and analytical tools for this task. Many of the essays are interdisciplinary in scope and in addition to economics the book should provide valuable lessons in psychology, sociology, social theory, philosophy, political science and history.

La démarche d'une recherche en sciences humaines-François Dépelteau 2010-01-21 Ce véritable manuel de base initie l'étudiant à une démarche scientifique de recherche sous l'angle méthodologique et épistémologique. Le champ d'application concerne toutes les disciplines des sciences humaines : psychologie, sociologie, histoire, économie, anthropologie, sciences politiques. L'ouvrage aborde les principales méthodes et techniques de recherche : la méthode expérimentale, la méthode historique, l'analyse de contenu, l'entrevue, l'observation et l'analyse de statistiques. La démarche scientifique est présentée de manière claire, complète et systématique : choix du sujet de la recherche, définition de la problématique, formulation des hypothèses, vérification ou réfutation de celles-ci, collecte et analyse des données, communication des résultats. De nombreux tableaux, encadrés, résumés rendent la présentation très pédagogique.

Making Human Rights Intelligible-Mikael Rask Madsen 2013-03-20 Human rights have become a defining feature of contemporary society, permeating public discourse on politics, law and culture. But why did human rights emerge as a key social force in our time and what is the relationship between rights and the structures of both national and international society? By highlighting the institutional and socio-cultural context of human rights, this timely and thought-provoking collection provides illuminating insights into the emergence and contemporary societal significance of human rights. Drawn from both sides of the Atlantic and adhering to refreshingly different theoretical orientations, the contributors to this volume show how sociology can develop our understanding of human rights and how the emergence of human rights relates to classical sociological questions such as social change, modernisation or state formation. Making Human Rights Intelligible provides an important sociological account of the development of international human rights. It will be of interest to human rights scholars and sociologists of law and anyone wishing to deepen their understanding of one of the most significant issues of our time.

Les Sciences sociales dans le monde-Ali Kazancigil 2001 Le 20e siècle a été le siècle des sciences sociales. Leur développement rapide d'après-guerre a été ébranlé par la crise traversée par les sociétés au cours du dernier quart de siècle. L'optimisme et l'universalisme dont elles étaient porteuses ont été remis en cause et l'on sait depuis que le monde ne peut être compris qu'à partir d'une multiplicité de points de vue. L'ouvrage, fruit d'un travail collectif, offre un panorama international des sciences sociales en général dans les diverses parties du monde (sciences sociales en Asie du Sud puis en Asie de l'Est, dans le Pacifique...), de l'état de la recherche dans certains champs d'application, des liens entre la recherche et la décision enfin des questions relatives aux données statistiques et à leur utilisation. Il s'agit d'un outil d'évaluation qui facilite l'approche à chaque personne désireuse de comprendre ces sciences qui ont pour ambition d'éclairer les choix individuels et collectifs.

Interdisciplinary Approaches to Canadian Society-Alan F.J. Artibise 1990-08-01 Far more than a bibliographic account of the major works in Canadian Studies, Interdisciplinary Approaches to Canadian Society provides a

broad examination of the state of this growing field of study. Each chapter stresses the importance of the interdisciplinary and multidisciplinary approaches which have come to characterize Canadian Studies. Also, in an unprecedented collaborative effort, almost all the chapters are jointly authored by anglophone and francophone scholars. The works on Quebec and the francophone community respect the distinct nature of this facet of Canada. As stated in the introduction, this work is "a primer in the field and a guide to further pursuits. Its users will welcome it as a friendly introduction to an exciting country."

Principalities and Powers-Jamie Pitts 2013-07-12 Evaluations of John Howard Yoder's legacy have proliferated since his death in 1997. Although there is much disagreement, a broad consensus is forming that his theology was, on the one hand, focused on the social and political meaning of the New Testament accounts of Jesus Christ and, on the other hand, sociologically reductive, hermeneutically tendentious, and ecclesiologicaly ambiguous. This book proposes a revision of Yoder's theology that maintains its broadly sociological emphasis but corrects for its apparent problems. In specific, adjustments are made to his social theory to open it to spiritual reality, to hone its analytical approach, and to clarify its political import. His preferred framework for social criticism, the theology of the principalities and powers, is examined in the context of his wider work and its critics, and then synthesized with concepts from Pierre Bourdieu's influential reflexive sociology.

Work in Transition-Arnd-Michael Nohl 2014-11-21 Despite the fact that many countries target highly skilled migrants for recruitment in the global labour market, few of those migrants are able to take full advantage of their educational and professional qualifications in their new homes. Work in Transition examines this paradox, using extended narrative interviews that focus on the role that cultural capital plays in the labour market.

Comparing the migrant experience in Germany, Canada, and Turkey, Work in Transition shows how migrants develop their cultural capital in order to enter the workforce, as well as how failure to leverage that capital can lead to permanent exclusion from professional positions. Exposing the mechanisms that drive inclusion and exclusion for migrants from a transatlantic comparative perspective, this book provides a unique analytical approach to an increasingly important global issue.

World Literature in Theory-David Damrosch 2013-12-16 World Literature in Theory provides a definitive exploration of the pressing questions facing those studying world literature today. Coverage is split into four parts which examine the origins and seminal formulations of world literature, world literature in the age of globalization, contemporary debates on world literature, and localized versions of world literature Contains more than 30 important theoretical essays by the most influential scholars, including Johann Wolfgang von Goethe, Hugo Meltzl, Edward Said, Franco Moretti, Jorge Luis Borges, and Gayatri Spivak Includes substantive introductions to each essay, as well as an annotated bibliography for further reading Allows students to understand, articulate, and debate the most important issues in this rapidly changing field of study

Deconstructing Pierre Bourdieu-Jeannine Verdes-Leroux 2007 World-famous in sociology and philosophy circles, Pierre Bourdieu has been untouchable - until now. Witty, sharp and rigorous, author Verdes-Leroux paints a highly charged portrait, denouncing his militancy, hypocrisy, elitism and shallowness.

How Did They Become Voters?:The History of Franchise in Modern European Representation-Raffaele Romanelli 1998-08-19 This work contains the updated papers presented at the Conference "How Did They Become Voters? The History of Franchise in Modern European Representational Systems", which was organized under the auspices of the European University Institute and held on 20-22 April 1995 in Florence. It examines the basic mechanisms regulating electoral processes in many countries, both in Europe and the rest of the world, in the 19th and 20th centuries.

Exchanges and Correspondence-Claudette Fillard 2010-08-11 Through the eighteen essays of this book, the reader becomes the beholder of a challenging survey of "feminism-in-the-making," from its early stages in the 18th century to the present, in Anglo-Saxon countries and elsewhere, including Eastern Europe and some places under the influence of communism or Islam. The development of exchanges and correspondence enabled feminism to pre-exist the word itself, which leads several contributors to ponder over its meaning as well as over the notion of influence, a pivotal component of their reflection. Through the complex interplay of harmony and disharmony, openly acknowledged or carefully hidden similarities or differences, and the delineation of the converging or conflicting forces which the authors of this volume attempt to disentangle, a fascinating chorus of

voices eventually emerges from this volume, a preview of the budding "sisterhood." It throws light on the major factors in women's growing consciousness of their plight and of the main stakes in the struggle for the defense of their rights. Scholars of different national origins and methodological approaches here join forces until the book itself amounts to an innovative web of exchanges and correspondences, its medium as well as its avowed message.

Bourdieu's Theory of Social Fields-Mathieu Hilgers 2014-11-13 Bourdieu's theory of social fields is one of his key contributions to social sciences and humanities. However, it has never been subjected to genuine critical examination. This book fills that gap and offers a clear and wide-ranging introduction to the theory. It includes a critical discussion of its methodology and relevance in different subject areas in the social sciences and humanities. Part I "theoretical investigations" offers a theoretical account of the theory, while also identifying some of its limitations and discussing several strategies to overcome them. Part II "Education, culture and organization" presents the theory at work and highlights its advantages and disadvantages. The focus in Part III devoted to "The State" is on the formation and evolution of the State and public policy in different contexts. The chapters show the usefulness of field theory in describing, explaining and understanding the functioning of the State at different stages in its historical trajectory including its recent redefinition with the advent of the neoliberal age. A last chapter outlines a postcolonial use of the theory of fields.

Multiple Correspondence Analysis-Brigitte Le Roux 2009-12-16 Requiring no prior knowledge of correspondence analysis, this text provides a nontechnical introduction to Multiple Correspondence Analysis (MCA) as a method in its own right. The authors, Brigitte LeRoux and Henry Rouanet, present the material in a practical manner, keeping the needs of researchers foremost in mind. Key Features Readers learn how to construct geometric spaces from relevant data, formulate questions of interest, and link statistical interpretation to geometric representations. They also learn how to perform structured data analysis and to draw inferential conclusions from MCA. The text uses real examples to help explain concepts. The authors stress the distinctive capacity of MCA to handle full-scale research studies. This supplementary text is appropriate for any graduate-level, intermediate, or advanced statistics course across the social and behavioral sciences, as well as for individual researchers. Chantiers et défis de la recherche sur le Maghreb contemporain-Pierre-Robert Baduel 2009 Depuis la fin des années 1990, on a assisté en France conjointement au retour de la question coloniale " et à l'émergence d'une " question postcoloniale ". L'amnésie à l'égard de la guerre d'Algérie a commencé à se réduire sous l'effet d'événements concordants : procès Papon (1998), nouveaux témoignages de victimes et de bourreaux sur la torture de l'armée française, " appel des indigènes de la République " (janvier 2005), " violences des banlieues " (octobre- novembre 2005), vote par l'Assemblée nationale française d'une loi mémorielle " demandant reconnaissance du " rôle positif de la présence française outre-mer " (février 2005), film Indigènes... Pendant ce temps-là, au Maghreb, en 2005 l'Algérie se remémorait la répression sanglante de Sétif (mai 1945), en 2006 le Maroc et la Tunisie commémoraient le cinquantenaire de leur Indépendance. La concurrence des mémoires communautaires devint l'enjeu d'un débat sociétal mais aussi d'un débat cognitif. Dans cette conjoncture, les sciences humaines et sociales furent en effet interpellées. Il leur fut parfois reproché de n'avoir pas suffisamment investi les objets en question et d'avoir ainsi laissé libre champ aux interventions du politique. Le présent ouvrage a été conçu comme une participation à ces débats. Il se veut une illustration des nombreux et riches chantiers ouverts par les sciences humaines et sociales sur le Maghreb contemporain, ses populations et leur devenir, dans l'espace national comme, à travers ses diasporas européennes, dans un espace postcolonial. Il montre comment, en se consolidant et en se renouvelant dans ses différentes disciplines, la recherche maghrébine et européenne s'est efforcée de relever un double défi : celui d'une " mémoire juste " et de " récits fiables ".

The Democracy Makers-Nicolas Guilhot 2005-04-13 Has the international movement for democracy and human rights gone from being a weapon against power to part of the arsenal of power itself? Nicolas Guilhot explores this question in his penetrating look at how the U.S. government, the World Bank, political scientists, NGOs, think tanks, and various international organizations have appropriated the movement for democracy and human rights to export neoliberal policies throughout the world. His work charts the various symbolic, ideological, and political meanings that have developed around human rights and democracy movements. Guilhot suggests that these

shifting meanings reflect the transformation of a progressive, emancipatory movement into an industry, dominated by "experts," ensconced in positions of power. Guilhot's story begins in the 1950s when U.S. foreign policy experts promoted human rights and democracy as part of a "democratic international" to fight the spread of communism. Later, the unlikely convergence of anti-Stalinist leftists and the nascent neoconservative movement found a place in the Reagan administration. These "State Department Socialists," as they were known, created policies and organizations that provided financial and technical expertise to democratic movements, but also supported authoritarian, anti-communist regimes, particularly in Latin America. Guilhot also traces the intellectual and social trajectories of key academics, policymakers, and institutions, including Seymour M. Lipset, Jeane Kirkpatrick, the "Chicago Boys," including Milton Friedman, the National Endowment for Democracy, and the Ford Foundation. He examines the ways in which various individuals, or "double agents," were able to occupy pivotal positions at the junction of academe, national, and international institutions, and activist movements. He also pays particular attention to the role of the social sciences in transforming the old anti-Communist crusades into respectable international organizations that promoted progressive and democratic ideals, but did not threaten the strategic and economic goals of Western governments and businesses. Guilhot's purpose is not to disqualify democracy promotion as a conspiratorial activity. Rather he offers new perspectives on the roles of various transnational human rights institutions and the policies they promote. Ultimately, his work proposes a new model for understanding the international politics of legitimate democratic order and the relation between popular resistance to globalization and the "Washington Consensus."

Historical Identities-E. Lisa Panayotidis 2006-12-15 As intellectual engines of the university, professors hold considerable authority and play an important role in society. By nature of their occupation, they are agents of intellectual culture in Canada. Historical Identities is a new collection of essays examining the history of the professoriate in Canada. Framing the volume with the question, 'What was it like to be a professor?' editors Paul Stortz and E. Lisa Panayotidis, along with an esteemed group of Canadian historians, strive to uncover and analyze variables and contexts - such as background, education, economics, politics, gender, and ethnicity - in the lives of academics throughout Canada's history. The contributors take an in-depth approach to topics such as academic freedom, professors and the state, faculty development, discipline construction and academic cultures, religion, biography, gender and faculty wives, images of professors, and background and childhood experiences. Including the best and most recent critical research in the field of the social history of higher education and professors, Historical Identities examines fundamental and challenging topics, issues, and arguments on the role and nature of intellectualism in Canada.

Guide d'élaboration d'un projet de recherche en sciences sociales-Gordon Mace 2010-01-21 Le projet de recherche est un outil fondamental pour aider à structurer la pensée ainsi qu'à développer l'autonomie en recherche, la capacité d'analyse et l'esprit de synthèse. Cette nouvelle édition est avant tout un condensé des différentes étapes du processus de recherche où sont exposés et commentés avec le plus de rigueur tous les rudiments essentiels d'une démarche méthodologique. L'ouvrage vise ainsi, étape par étape, à aider l'étudiant ou le chercheur à élaborer un projet de recherche qui constitue le préalable à toute analyse d'envergure.
