In Search of Sacred Time-Jacques Le Goff
2020-05-12 How The Golden Legend shaped the medieval imagination It is impossible to understand the Middle Ages without grasping the importance of The Golden Legend, the most popular medieval collection of saints' lives. Assembled in the thirteenth century by Genoese archbishop Jacobus de Voragine, the book became the medieval equivalent of a bestseller. In Search of Sacred Time is the first comprehensive history and interpretation of this crucial book. Jacques Le Goff, who was one of the world's most renowned medievalists, provides a lucid and compelling account that shows how The Golden Legend Christianized time itself, reconciling human and divine temporality. Authoritative, eloquent, and original, In Search

of Sacred Time is a major reinterpretation of a book that is central to comprehending the medieval imagination.

Incest-Marquis de Sade 2013-05-01 When the immoral libertine Monsieur de Franval marries and fathers a daughter, he decides to inculcate in her a sense of absolute freedom, an unconventional education that involves the two becoming secret lovers. But Franval's virtuous, God-fearing wife becomes suspicious and confronts him, setting off a tragic chain of events. Part of Sade's The Crimes of Love cycle, this shocking tale - which was among the writings banned for publication until the twentieth century - tests the limits of morality and portrays the disastrous consequences of freedom and pleasure.

Giovanni Battista Guccia-Benedetto Bongiorno

2018-07-19 This book examines the life and work

of mathematician Giovanni Battista Guccia, founder of the Circolo Matematico di Palermo and its renowned journal, the Rendiconti del Circolo matematico di Palermo. The authors describe how Guccia, an Italian geometer, was able to establish a mathematical society in Sicily in the late nineteenth century, which by 1914 would grow to become the largest and most international in the world, with one of the most influential journals of the time. The book highlights the challenges faced by Guccia in creating an international society in isolated Palermo, and places Guccia's activities in the wider European context through comparisons with the formation of the London Mathematical Society and the creation of Mittag-Leffler's Acta Mathematica in Stockholm. Based on extensive

searches in European archives, this scholarly work follows both historical and scientific trends, and will appeal to those interested in the history of mathematics and science in general.
