

[DOC] La Responsabilita Numarique Restaurer La Confiance A La Re Numarique

If you ally obsession such a referred **la responsabilita numarique restaurer la confiance a la re numarique** books that will present you worth, acquire the enormously best seller from us currently from several preferred authors. If you desire to comical books, lots of novels, tale, jokes, and more fictions collections are in addition to launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every book collections la responsabilita numarique restaurer la confiance a la re numarique that we will completely offer. It is not vis--vis the costs. Its roughly what you obsession currently. This la responsabilita numarique restaurer la confiance a la re numarique, as one of the most keen sellers here will unquestionably be along with the best options to review.

A History of Architectural Conservation-Jukka Jokilehto 2017-10-20 The first book to provide a full history of the development of architectural conservation, A History of Architectural Conservation is considered a landmark publication by architectural conservation students and professionals the world over. Twenty years after its first publication, this new edition of Jukka Jokilehto's groundbreaking book continues the story to bring the history of architectural conservation right up to the modern day. Jokilehto draws on his distinguished career of over 40 years at ICCROM (International Centre for the Study of the Preservation and Restoration of Cultural Property, founded by UNESCO) to provide studies from Europe, the Middle East, the USA, Japan, India, China, Australia and South America. This accessible and well-written introduction to the history and theory of architectural conservation is richly illustrated in full colour and will be an essential go-to guide for students and practitioners worldwide.

Landscape Facets-Council of Europe 2012-01-01 The European Landscape Convention was adopted under the auspices of the Council of Europe with the aim of promoting the protection, management and planning of European landscape and organising European co-operation in this area. It is the first international treaty covering all aspects of landscape. It applies to the entire territory of the contracting parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes that might be considered outstanding, commonplace or deteriorated. The convention represents an important contribution to achieving the Council of Europe's objectives, namely to promote democracy, human rights and the rule of law, as well as to seek common solutions to the main problems facing European society. By taking into account landscape, culture and nature, the Council of Europe seeks to protect the quality of life and well-being of Europeans in a sustainable development perspective.

The New Populism-Marco Revelli 2019-07-02 A crisp and trenchant dissection of populism today The word 'populism' has come to cover all manner of sins. Yet despite the prevalence of its use, it is often difficult to understand what connects its various supposed expressions. From Syriza to Trump and from Podemos to Brexit, the electoral earthquakes of recent years have often been grouped under this term. But what actually defines 'populism'? Is it an ideology, a form of organisation, or a mentality? Marco Revelli seeks to answer this question by getting to grips with the historical dynamics of so-called 'populist' movements. While in the early days of democracy, populism sought to represent classes and social layers who asserted their political role for the first time, in today's post-democratic climate, it instead expresses the grievances of those who had until recently felt that they were included. Having lost their power, the disinherited embrace not a political alternative to -isms like liberalism or socialism, but a populist mood of discontent. The new populism is the 'formless form' that protest and grievance assume in the era of financialisation, in the era where the atomised masses lack voice or organisation. For Revelli, this new populism the child of an age in which the Left has been hollowed out and lost its capacity to offer an alternative.

The Art of Translation-Jirí Levý 2011 Jirí Levý's seminal work, The Art of Translation, considered a timeless classic in Translation Studies, is now available in English. Having drawn on adjacent disciplines, the methodology of Czech functional sociosemiotic structuralism and the state-of-the art in the West, Levý synthesized his findings and experience in the field presenting them in a reader-friendly book, which combines the approaches of a theoretician, systemic analyst, historian, critic, teacher, practitioner and populariser. Although focused on literary translation from theoretical, descriptive and historical perspectives, it presents a conceptualization of a general theory, addressing a number of issues discussed today. The 'practical' mission of the book as a theory extending to practice is based on the same historical-dialectic affinity of methods, norms, functions and values, accounting for the translator's agency and other contextual agents involved in the communication process. The book will be useful to translators, researchers, students and teachers in Translation and Literary Studies.

Public-Private Partnerships and Concessions in the EU-Piotr Bogdanowicz 2020-08-28 In view of the fact that public infrastructure, health and other services are being more consistently delivered through Public-Private Partnerships (PPPs) and concessions; this timely book explores these complex contractual arrangements involving cooperation between public and private sectors. It considers that PPPs have become increasingly prevalent following the financial crisis and examines the applicable legal regimes that are still, to a large extent, unclear to many.

Constraints and Possibilities-Mauro Ceruti 1994 Originally published in the Italian,Constraints and Possibilitieshas caused a considerable stir in Europe and has already been translated into several languages. In what noted cyberneticist Heinz von Foerster called a stroke of genius, Ceruti applies a new perspective to our understanding of evolution, and startlingly outlines how the evolution of our knowledge and our knowledge of evolution have in fact been mirror images of each other. Expanding on the intellectual tradition of Gregory Bateson, Ervin Laszlo, Stephen Jay Gould, and Niles Eldredge, Ceruti's work is a testament to the paradigm shift occurring in science today. Indispensable reading for anyone interested in the evolution of our conception of knowledge.

Fresh Water in International Law-Laurence Boisson de Chazourmes 2013-09-19 This book addresses the diverse ways in which international law governs the uses, management, and protection of fresh water. The international law of fresh water is most comprehensively understood in the light of the different bodies of norms applicable to these varied uses and functions. The regulation of fresh water has primarily developed through the conclusion of treaties concerning international watercourses. Yet a number of other legal regimes also apply to the governance of fresh water. In particular, there has been an increasing recognition of the importance of fresh water to environmental protection. The development of international human rights law and international humanitarian law has also proven crucial for ensuring the sound and equitable management of this resource. In addition, the economic uses of fresh water feature prominently in the law applicable to watercourses, while water itself has become an important element of the trade and investment regimes. These bodies of rules and principles not only surface in an array of dispute settlement mechanisms, but also stimulate wider trends of institutionalization. The book investigates the origin and scope of these bodies of norms as they apply to fresh water, and demonstrates how they connect and adapt to one another, forming an integrated body of international principles. This approach is accompanied by a detailed analysis of the practice of states and of international organizations, taking into account the activities of the many non-state actors involved in the treatment of fresh water.

Book Was There-Andrew Piper 2012-10-12 Andrew Piper grew up liking books and loving computers. While occasionally burying his nose in books, he was going to computer camp, programming his Radio Shack TRS-80, and playing Pong. His eventual love of reading made him a historian of the book and a connoisseur of print, but as a card-carrying member of the first digital generation—and the father of two digital natives—he understands that we live in electronic times. Book Was There is Piper's surprising and always entertaining essay on reading in an e-reader world. Much ink has been spilled lamenting or championing the decline of printed books, but Piper shows that the rich history of reading itself offers unexpected clues to what lies in store for books, print or digital. From medieval manuscript books to today's playable media and interactive urban fictions, Piper explores the manifold ways that physical media have shaped how we read, while also observing his own children as they face the struggles and triumphs of learning to read. In doing so, he uncovers the intimate connections we develop with our reading materials—how we hold them, look at them, share them, play with them, and even where we read them—and shows how reading is interwoven with our experiences in life. Piper reveals that reading's many identities, past and present, on page and on screen, are the key to helping us understand the kind of reading we care about and how new technologies will—and will not—change old habits. Contending that our experience of reading belies naive generalizations about the future of books, Book Was There is an elegantly argued and thoroughly up-to-date tribute to the endurance of books in our ever-evolving digital world.

After Occupy-Tom Malleson 2014-06 After Occupy scrutinizes power structures in workplaces, markets and investment institutions to boldly argue that democracy shouldn't just be a feature of political institutions but of economic institutions as well.

The Essential Communitarian Reader-Amitai Etzioni 1998 This comprehensive book shows why communitarian thought has had such a profound influence on contemporary American public policy, from strengthening our neighborhoods to fighting AIDS and educating our children. Edited by Amitai Etzioni, founder of the Communitarian Network, this anthology contains essays written by the nation's most respected thinkers, including Robert Bellah, Mary Ann Glendon, Benjamin Barber, Senator Bill Bradley, Jean Bethke Elshtain, and many others. See why politicians as diverse as Vice President Al Gore and Jack Kemp view communitarian social philosophy as the most practical way of restoring America's communities and redeeming its political institutions.

Landuse in the Roman Empire-Jesper Carlsen 1994 Proceedings of a symposium held in January of 1993 by the Danish Institute in Rome, 1993.

French Civil Liability in Comparative Perspective-Jean-Sébastien Borghetti 2019-12-26 The French law of torts or of extra-contractual liability is widely seen as

exceptional. For long it was based on a mere five articles of the Civil Code of 1804, but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance. While the rest of the general law of obligations (including contract) in the Civil Code was reformed in 2016 by executive ordonnance, this area was left aside, being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability, a new legislative category to include both contractual and extra-contractual liability. This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems. In doing so, it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future.

Of the Five Wounds of the Holy Church-Antonio Rosmini 1883

Awakening Genius in the Classroom-Thomas Armstrong 1998 "Every student is a genius," declares author Thomas Armstrong, and an educator's most important job is to discover and nurture the "genius qualities" that all students were born with but that may no longer be obvious. Urging readers to look beyond traditional understandings of what constitutes genius, Armstrong describes 12 such qualities: curiosity, playfulness, imagination, creativity, wonder, wisdom, inventiveness, vitality, sensitivity, flexibility, humor, and joy. He cites research in various fields that supports this broader understanding of genius and explains how influences in the home, the popular media, and the school itself "shut down" the genius in students. Combining thoughtful insights and practical information, Armstrong offers guiding principles to help educators awaken genius in the classroom--beginning with awakening the genius in themselves. Readers will find dozens of suggested activities and helpful resources to provide "genius experiences" and create a "genial climate" in the classroom. In addition, suggestions for further study at the end of each section provide starting points for personal and professional reflection and growth. As it celebrates the potential brainpower waiting to be unlocked in classrooms everywhere, Awakening Genius in the Classroom inspires educators to look at their students from a different perspective and to reinvigorate their teaching with a new sense of excitement and possibility. The result, Armstrong concludes, could extend far beyond the classroom and transform not only our schools, but the entire world.

The Little Blue Book-George Lakoff 2012-06-26 Provides guidelines for United States Democrats to connect moral values to important policies, using practical tactics to guide political discourse away from extreme positions.

Paris as Revolution-Priscilla Parkhurst Ferguson 1997-01-01 "In this absolutely powerful and innovative book, Priscilla Parkhurst Ferguson illuminates the complex links between the Revolution of 1789, the different revolutions that took place in 19th-century Paris, and two aesthetic forms characteristic of the cultural discourses of modernity: panoramic journalism and the realist and historical novels authored by Balzac, Flaubert, Hugo, Zola, and Valles. A work of cultural history with stimulating implications, Paris as Revolution is well-structured, carefully argued and problematized, and compelling in its scholarship."--Catherine Nesci, author of La Femme mode d'emploi "A fascinating and richly suggestive essay on the cultural geography of nineteenth-century Paris. It is imaginatively conceived, broad in its reach, boldly interdisciplinary. Ferguson's success in combining literary criticism, historical interpretation and sociological analysis to reconstruct the shifting meanings given to the experiences of urbanization and revolution is most impressive."--Jonathan Beecher, author of Charles Fourier: The Visionary and His World

Anthropocene or Capitalocene?-Elmar Altvater 2016-05-03 The Earth has reached a tipping point. Runaway climate change, the sixth great extinction of planetary life, the acidification of the oceans—all point toward an era of unprecedented turbulence in humanity's relationship within the web of life. But just what is that relationship, and how do we make sense of this extraordinary transition? Anthropocene or Capitalocene? offers answers to these questions from a dynamic group of leading critical scholars who challenge the conventional practice of dividing historical change and contemporary reality into "Nature" and "Society," demonstrating the possibilities offered by a more nuanced and connective view of human environment-making, joined at every step with and within the biosphere. In distinct registers, the authors frame their discussions within a politics of hope that signal the possibilities for transcending capitalism, broadly understood as a "world-ecology" that joins nature, capital, and power as a historically evolving whole.

Management Reset-Edward A. Lawler, III 2011-03-29 Provocative new management principles and practices that create effective organizations for shareholders and society Management experts Lawler and Worley have developed a set of management principles that enable organizations to be both successful and responsible. Existing command & control and high-involvement management styles depend too much on stable conditions and focus too narrowly on economic outcomes. They convincingly argue that we need to "reset" our approach to management to one that fits today's demanding business environment. Starting with a change in how success is measured and a more realistic view of risk, Lawler and Worley take us through how strategy, governance, organization structure and talent should be managed. The result is an organization that can reliably produce financial, social, and ecological results. Includes illustrative lessons from Microsoft, Cisco, Netflix, DaVita, Starbucks, Nokia, and the U.S. Secret Service Offers clear prescriptions for managers who want to organize for sustainable performance effectiveness Lawler and Worley are the authors of the bestselling Built to Change Lawler and Worley outline why and how the current practice of management must change in order for organizations to achieve sustained organizational effectiveness.

New Directions in European Public Law-Jack Beatson FBA 1998 From two symposia in the winter and spring of 1997 at Cambridge, England, 13 essays analyze a cluster of issues arising in the European Union public law arena. Some deal with issues of liability and the availability of remedies in European and domestic law. Others take a broader view, looking at the phenomenon of cross-fertilization among national legal systems and between national systems and European Union law. Black Music-LeRoi Jones 2010-01-01 The essential collection of jazz writing by the celebrated poet and author of Blues People—reissued with a new introduction by the author. In the 1960s, LeRoi Jones—who would later be known as Amiri Baraka—was a pioneering jazz critic, articulating in real time the incredible transformations of the form taking place in the clubs and coffee houses of New York City. In Black Music, he sheds light on the brilliant young jazz musicians of the day: John Coltrane, Thelonious Monk, Miles Davis, Ornette Coleman, Cecil Taylor, Archie Shepp, Sun Ra, and others. Combining firsthand immediacy with wide-ranging erudition, Black Music articulates the complexities of modern jazz while also sharing insights on the nature of jazz criticism, the creative process, and the development of a new way forward for black artists. This rich and vital collection is comprised of essays, reviews, interviews, liner notes, musical analyses, and personal impressions from 1959-1967. “In Black Music, Baraka wrote with ecstasy—highly informed and intricate—about ecstatically complex music.”—Richard Brody, The New Yorker

The Proactionary Imperative-S. Fuller 2014-07-16 The Proactionary Imperative debates the concept of transforming human nature, including such thorny topics as

humanity's privilege as a species, our capacity to 'play God', the idea that we might treat our genes as a capital investment, eugenics and what it might mean to be 'human' in the context of risky scientific and technological interventions.

The Emperor and the Roman Army, 31 BC-AD 235-J. B. Campbell 1984

A Conflict of Interest-Adam Mitzner 2012-03-27 Criminal defense lawyer Alex Miller is introduced to a powerful family friend only to learn that the man has been accused of crimes involving millions of dollars, a situation that brings to light devastating personal secrets.

Medical Enhancement and Posthumanity-Bert Gordijn 2008-10-20 As we are increasingly using new technologies to change ourselves beyond therapy and in accordance with our own desires, understanding the challenges of human enhancement has become one of the most urgent topics of the current age. This volume contributes to such an understanding by critically examining the pros and cons of our growing ability to shape human nature through technological advancements. The authors undertake careful analyses of decisive questions that will confront society as enhancement interventions using bio-, info-, neuro- and nanotechnologies become widespread in the years to come. They provide the reader with the conceptual tools necessary to address such questions fruitfully. What makes the book especially attractive is the combination of conceptual, historical and ethical approaches, rendering it highly original. In addition, the well-balanced structure allows both favourable and critical views to be voiced. Moreover, the work has a crystal clear structure. As a consequence, the book is accessible to a broad academic audience. The issues raised are of interest to a wide reflective public concerned about science and ethics, as well as to students, academics and professionals in areas such as philosophy, applied ethics, bioethics, medicine and health management.

Two-Roberto Esposito 2015-09-01 The debate on “political theology” that ran throughout the twentieth century has reached its end, but the ultimate meaning of the notion continues to evade us. Despite all the attempts to resolve the issue, we still speak its language—we remain in its horizon. The reason for this, says Roberto Esposito, lies in the fact that political theology is neither a concept nor an event; rather, it is the pivot around which the machine of Western civilization has revolved for more than 2,000 years. At its heart stands the juncture between universalism and exclusion, unity and separation: the tendency of the Two to make itself into One

by subordinating one part to the domination of the other. All the philosophical and political categories that we use, starting with the Roman and Christian notion of “the person,” continue to reproduce this exclusionary dispositif. To take our departure from political theology, then—the task of contemporary philosophy—we must radically revise our conceptual lexicon. Only when thought has been returned to its rightful “place”—connected to the human species as a whole rather than to individuals—will we be able to escape from the machine that has imprisoned our lives for far too long.

Town and Country in Roman Tripolitania-D. J. Buck 1985 Eighteen papers in honour of Olwen Hackett. Subjects include: the historical development of Sabratha (P. M. Kenrick); olive oil production (D. J. Mattingly); provincial art (H. M. Walda); frontier processes (D. J. Buck); civil administrators and military commanders (G. H. Donaldson); climate and social dynamics (J. R. Burns and B. Denness); Romans and Garamantes (M. Milburn) and the UNESCO Libyan Valleys Survey (G. D. B. Jones and G. W. W. Barker).

The Reception of Vatican II-Giuseppe Alberigo 1987

Dictionnaire Historique de L'Ancien Langage François-La Curne De Sainte-Palaye 2019-02-20 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Better than Human-Allen Buchanan 2011-07-01 Is it right to use biomedical technologies to make us better than well or even perhaps better than human? Should we view our biology as fixed or should we try to improve on it? College students are already taking cognitive enhancement drugs. The U.S. army is already working to develop drugs and technologies to produce “super soldiers.” Scientists already know how to use genetic engineering techniques to enhance the strength and memories of mice and the application of such technologies to humans is on the horizon. In Better Than Human, philosopher-bioethicist Allen Buchanan grapples with the ethical dilemmas of the biomedical enhancement revolution. Biomedical enhancements can make us smarter, have better memories, be stronger, quicker, have more stamina, live much longer, avoid the frailties of aging, and enjoy richer emotional lives. In spite of the benefits that biomedical enhancements may bring, many people instinctively reject them. Some worry that we will lose something important-our appreciation for what we have or what makes human beings distinctively valuable. Others assume that biomedical enhancements will only be available to the rich, with the result that social inequalities will worsen. Buchanan shows that the debate over enhancement has been distorted by false assumptions and misleading rhetoric. To think clearly about enhancement, we have to acknowledge that human nature is a mixed bag and that our species has many “design flaws.” We should be open to the possibility of becoming better than human, while never underestimating the risks that our attempts to improve may back-fire.

A World Atlas of Translation-Yves Gambier 2019-02-15 What do people think of translation in the different historical, cultural and linguistic traditions of the world? How many uses has translation been put to? How distant from one another are the concepts of translation found in the different traditions? These are some of the questions A World Atlas of Translation addresses. Its twenty-one reports give us pictures taken from the inside, both from traditions that are well represented in the literature and from the many that (for now) are not. But the Atlas is not content with documenting – no map is this innocent. In fact, the wealth of information collected and made accessible by its reporters can be useful to gauge the dispersion of translation concepts across traditions. As you read its reports, the Atlas will keep asking “How far apart do these concepts look to you?” Finally and more ambitiously, the reports can help us test the hypothesis that a cross-cultural notion of translation exists. In this respect, the Atlas is mostly a proof of concept. It hopes to encourage further fact-based research in quest of a robust and compelling unifying notion of translation.

Élitism, Populism, and European Politics-Jack Hayward 1996 The loss of public support for European political leaders and institutions has provoked a populist challenge. In this edited collection, Jack Hayward analyses the way this is reflected in the media, representative bodies, parties, and organized interests in a context of severe economic constraints upon public expectations.

The Body Economic-David Stuckler 2013-05-21 Politicians have talked endlessly about the seismic economic and social impacts of the recent financial crisis, but many continue to ignore its disastrous effects on human health—and have even exacerbated them, by adopting harsh austerity measures and cutting key social programs at a

time when constituents need them most. The result, as pioneering public health experts David Stuckler and Sanjay Basu reveal in this provocative book, is that many countries have turned their recessions into veritable epidemics, ruining or extinguishing thousands of lives in a misguided attempt to balance budgets and shore up financial markets. Yet sound alternative policies could instead help improve economies and protect public health at the same time. In The Body Economic, Stuckler and Basu mine data from around the globe and throughout history to show how government policy becomes a matter of life and death during financial crises. In a series of historical case studies stretching from 1930s America, to Russia and Indonesia in the 1990s, to present-day Greece, Britain, Spain, and the U.S., Stuckler and Basu reveal that governmental mismanagement of financial strife has resulted in a grim array of human tragedies, from suicides to HIV infections. Yet people can and do stay healthy, and even get healthier, during downturns. During the Great Depression, U.S. deaths actually plummeted, and today Iceland, Norway, and Japan are happier and healthier than ever, proof that public wellbeing need not be sacrificed for fiscal health. Full of shocking and counterintuitive revelations and bold policy recommendations, The Body Economic offers an alternative to austerity—one that will prevent widespread suffering, both now and in the future.

European Feminisms, 1700-1950-Karen M. Offen 2000 This ambitious book explores challenges to male hegemony throughout continental Europe over the past 250 years. For general readers and those interested primarily in the historical record, it provides a comprehensive, comparative account of feminist developments in European societies, as well as a rereading of European history from a feminist perspective. By placing gender, or relations between women and men, at the center of European politics, it aims to reconfigure our understanding of the European past and to make visible a long but neglected tradition of feminist thought and politics. On another level the book seeks to disentangle some misperceptions and to demystify some confusing contemporary debates about the Enlightenment, reason, nature, and public vs. private, equality vs. difference. In the process, the author aims to show that gender is not merely ‘a useful category of analysis’, but that sexual difference lies at the heart of human thought and politics.

Normativity in Perception-Maxime Doyon 2015-08-25 The ways in which human action and rationality are guided by norms are well documented in philosophy and neighboring disciplines. But how do norms shape the way we experience the world perceptually? The present volume explores this question and investigates the specific normativity inherent to perception.

The Spanish Second Republic Revisited-Manuel Alvarez Tardio 2013-02-04 The Spanish Civil War is one of the most studied events in modern European history. Its origins, that is to say the politics of the Second Republic (1931-1936), have been much debated. The republican period has been much idealised and in particular the myth of Spanish democracy beset by fascism, of which Franco was its leading figure, has been much cultivated. But was this really the case? Recently historians of the Republic have proposed a new and non-ideological perspective on the 1930s. Spains path was at once different yet in many ways similar to that of Europe during the inter-war period. The Spanish Second Republic Revisited brings together leading and innovative specialists to analyse the main obstacles to the consolidation of democracy in Spain and to debate the principal stereotypes of the traditional historiography of both left and right. The issues addressed include: the breakdown of democracy; whether the CEDA was an opportunity or a threat; the centrist appeal under the Republic; how the elections were viewed and conducted; the transformation of fascism; new revelations about the Communist party; the politics of exclusion at the local level; the perceived necessity for repression; new perspectives on the Civil Guard; the role of intellectuals in the Republic; and revisionism and sectarian history. The Spanish Second Republic Revisited offers a new and dynamic vision of why Spanish democracy failed to consolidate itself and why it finally fell into the terror of civil war. The book is essential reading for all those interested in modern European history.

Letter to the People of God.-Francesco (Jorge Mario Bergoglio) 2018

Research in Teaching and Learning about the Holocaust-Jolanta Ambrosewicz-Jacobs 2017-02-20

The Relational Theory of Contract-Ian R. Macneil 2001 This is an abridged collection of writings by Ian MacNeil, one of the foremost academics in the field of contract law, on the relational theory of contract. It brings together a number of important works that can be difficult to obtain, to give a concise statement of MacNeil's relational theory

Archive of Guglielmo Libri from its dispersal to the collections at the Biblioteca Moreniana-Andrea Del Centina 2004

The Neoconservatives-Peter Steinfels 1979 An extended analysis of the philosophy and activities of such men as Daniel P. Moynihan, Daniel Bell, and Irving Kristol, of their concerns and successes, and of their growing influence in every area of society.
