Homer the Theologian-Robert Lamberton 1989 Here is the first survey of the surviving evidence for the growth, development, and influence of the Neoplatonist allegorical reading of the Iliad and Odyssey. Professor Lamberton argues that this tradition of reading was to create new demands on subsequent epic and thereby alter permanently the nature of European epic. The Neoplatonist reading was to be decisive in the birth of allegorical epic in late antiquity and forms the background for the next major extension of the epic tradition found in Dante.

The Cambridge Companion to Plato's Republic-G. R. F. Ferrari 2007-06-18 This Companion provides a comprehensive account of this outstanding work, which remains among the most frequently read works of Greek philosophy, indeed of Classical antiquity in general. The sixteen essays, by authors who represent various academic disciplines, bring a spectrum of interpretive approaches to bear in order to aid the understanding of a wide-ranging audience, from first-time readers of the Republic who require guidance, to more experienced readers who wish to explore contemporary currents in the work's interpretation. The three initial chapters address aspects of the work as a whole. They are followed by essays that match closely the sequence in which topics are presented in the ten books of the Republic. Since the Republic returns frequently to the same topics by different routes, so do the authors of this volume, who provide the readers with divergent yet complementary perspectives by which to appreciate the Republic's principal concerns.

The New Bibliopolis-Willa Z. Silverman 2008-08-15 The late-nineteenth century in Europe was a period of profound political, social, and technological change. One result of these changes was the rise in France of an upper-bourgeois bohemian class. Many of its members stimulated interest in unique forms of artistic expression such as illustrated books. On account of their influence, an atmosphere of intense bibliophilic activity came to define French culture at the turn of the century. The New Bibliopolis explores the role of amateurs in promoting the book arts in France during this period. Drawing on extensive original research, Willa Z. Silverman looks at the ways in which book collectors supported print culture. She shows how, through the admiration demonstrated by collectors for this medium, print came to be a crucial part of popular conceptions of aesthetics. As collectors, publishers, authors, designers, and directors of bibliophile societies, reviews, and small presses, these book lovers became passionate and prolific interlocutors of the printed word in a uniquely artistic epoch. Silverman analyzes subjects as diverse as the relationship between book collecting and aesthetic and cultural currents such as Symbolism; the gendered nature of book collecting; the increased collaboration between authors and illustrators; and the marketing of fine books at international exhibits. The New Bibliopolis is an important contribution to the study of book history, French sociocultural history, and fine and decorative arts.

The Harlequin Years-Roger Nichols 2002 "The Harlequin Years presents a highly readable yet thorough examination of the Parisian music scene in the decade following World War I. Minerve et les muses-Jean-Marie Valentin 2007 Dans La République (livre X, 6076), Platon postule l'incompatibilité du " principe rationnel de l'âme ", auquel s'attache le penseur, et du caractère passionné et varié, " facile à imiter ", qui relève selon lui du métier de l'artiste. Cette différence (Siacopia) n'a cessé, en Allemagne notamment, de prendre de nouvelles formes ou de se voir contredite au cœur même de la pratique littéraire. A côté d'une écriture qui se développe à partir du mouvement de sa propre diégèse, se constitue une autre écriture qui inscrit en elle la réflexion et le débat. Confrontant la subjectivité à des instances de vérité, à des surmois tout-puissants ou contestés, ou encore à des savoirs constitués, la littérature remanie ainsi sans cesse l'" ordre de l'œuvre d'art ". Tenue volontiers pour philosophique voire métaphysique, la littérature allemande a ainsi largement sacrifié à cette présence plus ou moins explicite de l'idée. Toutefois, il ne s'agit pas banalement d'insertion de contenus, ni même de processus de métaphorisation, mais bien d'une extension du champ des possibles, d'une ouverture de la littérature à de nouvelles poétiques. Du XVIIe au XXe siècle, de la crise religieuse inaugurée par la Réforme au marxisme et au surréalisme, le parcours, sélectif, qui fonde ce livre, découvre des permanences et des cohérences où se constitue une forme d'histoire littéraire spécifique et toujours recommencée.

The New Cambridge Bibliography of English Literature: Volume 2, 1660-1800-George Watson 1971-07-02 More than fifty specialists have contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.

Nature Animated-M. Ruse 2012-12-06 These remarks preface two volumes consisting of the proceedings of the Third International Conference on the History and Philosophy of Science of the International Union of History and Philosophy of Science. The conference was held under the auspices of the Union, The Social Sciences and Humanities Research Council of Canada, and the Canadian Society for History and Philosophy of Science. The meetings took place in Montreal, Canada, 25-29 August 1980, with Concordia University as host institution. The program of the conference was arranged by a Joint Commission of the International Union of History and Philosophy of Science consisting of Robert E. Butts (Canada), John Murdoch (U. S. A. ), Vladimir Kirsanov (U. S. S. R. ), and Paul Weingartner (Austria). The Local Arrangements Committee consisted of Stanley G. French, Chair (Concordia), Michel Paradis, treasurer (McGill), Fran--ois Duchesneau (Universite de Montreal), Robert Nadeau (Universite du Quebec à Montreal), and William Shea (McGill University). Both committees are indebted to Dr. G. R. Paterson, then President of the Canadian Society for History and Philosophy of Science, who shared his expertise in many ways. Dr. French and his staff worked diligently and efficiently on behalf of all participants. The city of Montreal was, as always, the subtle mixture of extravagance, charm, warmth and excitement that retains her status as the jewel of Canadian cities. The funding of major international conferences is always a problem.

Buch 1993 David Buch's informative volume is the first modern study edition and commentary dealing with almost all of the surviving French five-part scores of dance music from the ballets de cour 1575-1651. These full scores are especial y important since most ballets from this time are preserved only in two-part readings (melody and bass). The exception here is a newly-created five-part score for the Ballet des Nations based on an original two-part setting. Also included are the six Allemandes from 1575 to ca. 1600 a Ballet cheval of 1615 a selection of miscellaneous Entres from several ballets prepared for the Concert Louis XIII par les Viollons et lest 12 Grands hautbois of 1627 and Philidor's five-part reading of seventeen Entres from the Ballet du Roy des Festes de Baccus of 1651.
