West European Communism and American Foreign Policy-Michael Arthur Ledeen 1987-01-01 The great vogue of Eurocommunism came to an end with the return of the French and Italian Communist Parties to positions of opposition to authority in the late 1970's, and the electoral confirmation that Spain's Communist Party would remain small. As the vogue of communism with a human face passed. The question of American policy toward Communists became far less pressing; yet the question will almost certainly require attention in the future. This is particularly true with respect to the Italian Communist Party, which remains powerful in numbers and flexible in policy. Michael Ledeen examines Communist Party participation in Western European governments since World War II, and the ambivalent American foreign policy toward it. He concentrates on the Italian Communist Party: its history and its relations with the Soviet Union. Togliatti, Secchia, Gramsci, Nenni are identified as the major players in Italian communist and socialist politics. The author explores in depth why the United States has been reluctant to become involved in internal Italian affairs, and how this policy posture has strongly influenced in the development of communism in Western Europe. Ledeen shows that the strategies of contemporary West European Communist Parties are now roughly similar to those of the immediate post-war period. He argues that American intellectuals are as uncritical of Eurocommunism as they were after the first flush of Allied victory in World War II, that the Carter administration's foreign policy was incoherent, and that the United States needs a consistent, ideological approach to communism--one that includes the capacity for action as well as reaction. Michael Ledeen is a senior associate of the Center for Strategic and International Studies at Georgetown University, and formerly taught history at Washington University. He was the founding editor of The Washington Quarterly, and is the author of, among other works, Grave New World; The First Duce: D'Annunzio at Fiume; and editor of U.S. Defense and Foreign Policy.

Pedalare! Pedalare!-John Foot 2011-05-03 The story of Italian cycling is the story of Italy in the twentieth century. Contemporary Italy-Martin J. Bull 1996 A unique bibliographic and historiographic guide to the study of contemporary Italy, this book points to over 650 texts that have shaped the academic and scholarly study of postwar Italy. Following the introduction, which outlines the context within which the evolution of Italian studies should be viewed, the book is divided into two parts. Part I includes five historiographic chapters providing a detailed survey and analysis of works published in history, politics, government, the economy, and society. Part II is an annotated bibliographic guide to all of the texts pointed to in Part I.

The Moment of Liberation in Western Europe-Gerd-Rainer Horn 2020-03-19 The Moment of Liberation in Western Europe, 1943-1948, regards the final two years of World War II and the immediate post-liberation period as a moment in twentieth century history, when the shape and contours of postwar Western Europe appeared highly uncertain and various alternatives and conflicting visions were up for grabs. After close to six years of total war, Nazi terror, and brutal occupation policies, a growing number of Europeans were no longer content solely to fight for national liberation from fascist control. Having staked their lives in military and civilian resistance to Nazism and Italian fascism across the continent, surviving activists were aiming to ensure that such a political and social catastrophe would never befall Europe again. In the closing moments of World War II, hundreds of thousands of antifascist activists had begun to identify with the famous quote penned by the exiled German social theorists, Max Horkheimer, who had boldly proclaimed in early September 1939: 'Whoever is not prepared to talk about capitalism should also remain silent about fascism.' The economic and political elites in prewar societies were increasingly regarded as co-responsible for war, fascism, and occupation policies, from which many had benefited

significantly and often enthusiastically. There were extensive popular social movements at work in almost every single state which aimed to construct postwar societies in which grassroots democracy and the free association of rank-and-file activists would replace the profit principle and the top-down Jacobin orientation by traditional elites. This study for the first time reconstructs the parameters of this contest over the shape of postwar Western Europe from a consistently transnational perspective.
