La rose des Highlands-Juliette Miller 2014-03-01 Ecosse, XIIIe siècle Roses est révoltée. Comment le seigneur Ogilvie a-t-il osé utiliser la force pour tenter d’abuser d’elle ? Elle qui travaille depuis toujoursau château est désormais contrainte à la fuite. Une fuite dans la lande glaciale au cours de laquelle elle aurait sans doute péri, si un mystérieux highlander ne lui avait porté secours et donné refuge... dans la forteresse qui appartient au clan ennemi de celui des Ogilvie. Dès le début, Wilkie MacKenzie, qui possède toute l’autorité et la noblesse d’un grand seigneur, se conduit comme tel avec elle. Pourtant, Roses sent que sa présence dérange les autres membres du clan. Pire, qu’elle représente un danger pour eux : n’est-il pas évident que le seigneur Ogilvie va vouloir la récupérer, par la force s’il le faut ? Mais si elle se sent la force de faire face à cette hostilité, et à cette menace, Roses ne sait si elle pourra cacher les sentiments brûlants que lui inspire Wilkie, alors que celui-ci va bientôt devoir se choisir une épouse de son rang... Née dans le Minnesota, elle a beaucoup voyagé avant de se fixer en Nouvelle-Zélande avec son mari vigneron et ses deux enfants. Comment son père, le chef du clan Morrison, a-t-il pu offrir sa main à Kade Mackenzie, une brute que tout le monde décrit comme un guerrier froid, insensible et ambitieux ? Rien de commun avec le doux Caleb, son amour de jeunesse que son père a banni pour l’avoir courtisée... Pourtant, en tant que fille de chef, Stella sait qu’elle n’a d’autre choix que de se soumettre, car une alliance avec les Mackenzie renforcerait la puissance du clan. Et, à sa grande surprise, la nuit de noces qu’elle craignait tant n’a pas lieu. Plutôt que de la contraindre, son nouvel époux lui propose un étrange marché : elle aura un mois pour s’habituer à lui. Passé ce délai, il la fera sienne... Robot-Proof-Joseph Aoun 2018-08-14 How to educate the next generation of college students to invent, to create, and to discover--filling needs that even the most sophisticated robot cannot. Driverless cars are hitting the road, powered by artificial intelligence. Robots can climb stairs, open doors, win Jeopardy, analyze stocks, work in factories, find parking spaces, advise oncologists. In the past, automation was considered a threat to low-skilled labor. Now, many high-skilled functions, including interpreting medical images, doing legal research, and analyzing data, are within the skill sets of machines. How can higher education prepare students for their professional lives when professions themselves are disappearing? In Robot-Proof, Northeastern University president Joseph Aoun proposes a way to educate the next generation of college students to invent, to create, and to discover--to fill needs in society that even the most sophisticated artificial intelligence agent cannot. A "robot-proof" education, Aoun argues, is not concerned solely with topping up students' minds with high-octane facts. Rather, it calibrates them with a creative mindset and the mental elasticity to invent, discover, or create something valuable to society--a scientific proof, a hip-hop recording, a web comic, a cure for cancer. Aoun lays out the framework for a new discipline, humanics, which builds on our innate strengths and prepares students to compete in a labor market in which smart machines work alongside human professionals. The new literacies of Aoun's humanics are data literacy, technological literacy, and human literacy. Students will need data literacy to manage the flow of big data, and technological literacy to know how their machines work, but human literacy--the humanities, communication, and design--to function as a human being. Life-long learning opportunities will support their ability to adapt to change. The only certainty about the future is change. Higher education based on the new literacies of humanics can equip students for living and working through change.

The Mindful College Applicant-Belinda H. Y. Chiu 2019-11-08 In a time when crossing guards are posted to prevent high schoolers from jumping in front of trains and parents shelling out \$100K for packaged college applications, education has become a mad race to grab the Ivy ring. Based on experience in admissions with the Ivy League and other highly competitive universities, emerging scientific evidence on the impact of emotional intelligence and mindfulness, and discussions with admissions officers, students, families, and high school counselors, this book is a guide on how to go through the existing, however brutish, college applications process with less stress and anxiety, and more joy and mindfulness. Equipped with the powerful tools of emotional intelligence and mindfulness, this work acknowledges the reality of what the process is, and challenges young people to reach for a more meaningful ideal for themselves. This book shares a look at the holistic admissions process and offers an alternative one to the current climate of untenable stress. This updated model aims to shift mindsets from treating the admissions process as a ruthless competition with one externally-prescribed definition of success, to a step in a lifelong journey of curiosity and wonder. By building self-awareness, compassion, resilience, it's possible to navigate the process with greater authenticity, balance, and joy.
