Lorsque de mystérieuses créatures sont aperçues à bord de la Roue, c'est un nouveau coup dur pour cette colonie déjà noyée dans les problèmes car les jeunes mineurs ne veulent plus descendre dans les mines labyrinthiques. Jusqu'au jour où la jeune Phee Laws, en surfant sur les anneaux de Saturne, sauve une étrange boîte bleue de la destruction. Doctor Who: Shada-Gareth Roberts 2012-06-26 From the unique mind of Douglas Adams, legendary author of The Hitchhiker's Guide to the Galaxy, comes Shada, a story scripted for the television series Doctor Who but never produced—and now transformed into an original novel... A little knowledge is a dangerous thing. Imagine how dangerous a LOT of knowledge is... The Doctor's old friend and fellow Time Lord, Professor Chronotis, has retired to Cambridge University, where among the other doddering old professors nobody will notice if he lives for centuries. He took with him a few little souvenirs—harmless things really. But among them, carelessly, he took The Worshipful and Ancient Law of Gallifrey. Even more carelessly, he has loaned this immensely powerful book to clueless graduate student Chris Parsons, who intends to use it to impress girls. The Worshipful and Ancient Law is among the most dangerous artifacts in the universe; it cannot be allowed to fall into the wrong hands. The hands of the sinister Skagra are unquestionably the wrongest ones possible. Skagra is a sadist and an egomaniac bent on universal domination. Having misguessed the state of fashion on Earth, he also wears terrible platform shoes. He is on his way to Cambridge. He wants the book. And he wants the Doctor...

Health Care and Government Policy-Laurinda Abreu 2019-06-19 Government policy refers primarily to the actions planned and implemented by the executive branch of a state to meet its society's needs. One of the most demanding areas both for policy makers and in terms of people's expectations is health, which social analysts and historians place among the most dynamic sectors over the last century. This is the focus of this book. It includes examinations of two of the most pressing issues facing national healthcare services today - 'Health systems at the stage of complexity: the need for collaborative intelligence' by Constantino Sakellarides et al. and 'Longer and better lives: the European fountain of youth' by Patrice Bourdelais - alongside historical analyses covering both earlier periods - 'Not just one countryside: life chances in pre-industrial Sweden' by Jan Sundin and 'Health care and poor relief in Portugal: an historical perspective' by Laurinda Abreu - and more recent times - 'The roots of the health reform in Spain' by Enrique Perdiguero-Gil e Josep M. Comelles. As the authors in this volume show in detail, population growth and increased quality of life have been among the greatest achievements of the second half of the twentieth century, but they should not be taken for granted. The fragility of these gains has been demonstrated statistically. The state has to invest in the public policies that best protect its citizens, particularly at times of low economic growth such as we are now experiencing, and take preventive action to preclude major social and economic costs. Civil society plays no less important a role in protecting the greater good of social cohesion. In short, both state and civil society need to consider future health policy in such a way as to overcome the inefficiencies of the past and make full use of the opportunities offered by science and technology to improve people's quality of life.

Salvator Rosa in French Literature-James Patty 2005-01-31 " Salvator Rosa (1615-1673) was a colorful and controversial Italian painter, talented musician, a notable comic actor, a prolific correspondent, and a successful satirist and poet. His paintings, especially his rugged landscapes and their evocation of the sublime, appealed to Romantic writers, and his work was highly influential on several generations of European writers. James S. Patty analyzes Rosa's tremendous influence on French writers, chiefly those of the nineteenth century, such as Stendhal, Honoré de Balzac, Victor Hugo, George Sand, and Théophile Gautier. Arranged in chronological order, with numerous quotations from French fiction, poetry, drama, art criticism, art history, literary history, and reference works, Salvator Rosa in French Literature forms a narrative account of the reception of Rosa's life and work in the world of French letters. James S. Patty, professor emeritus of French at Vanderbilt University, is the author of Dürer in French Letters . He lives in Nashville, Tennessee.

Capital Letters-Eve Morisi 2020 "'Capital Letters' sheds new light on how literature has dealt with society's most violent legal institution, the death penalty. It investigates this question through three major French authors with markedly distinct political convictions and literary styles: Victor Hugo, Charles Baudelaire, and Albert Camus. Working at the intersection of poetics, ethics, and law, Ève Morisi uncovers an unexpected transhistorical dialogue both on the modern death penalty and on the ends and means of post-Revolutionary literature. She offers close textual analysis and careful contextualization of the representations of state killing that these prominent writers crafted over two centuries during which the guillotine consistently fulfilled its function. Combined with concepts forged by critics of violence such as Agamben, Foucault, and Girard, this detailed examination reveals that, despite their differences, Hugo, Baudelaire, and Camus converge in questioning the humanitarian redefinition of capital punishment dating from the late eighteenth century. Conversely, capital justice leads all three writers to interrogate the functions, tools, and limits of their art"--Provided by publisher.
