Un lever de ténébres-Robert Jordan 2019-11-13 La Roue du Temps tourne et les Âges naissent et meurent, laissant dans leur sillage des souvenirs destinés à devenir des légendes. Forteresse réputée impenable depuis des millénaires, la Pierre de Tear est tombée, conquise par Rand al'Thor et un groupe d'Aiels, ces terribles guerriers du désert qui se voilent le visage pour combattre. Désormais en possession de l'épée mythique Callandor, Rand peut clamer à la face du monde qu'il est le Dragon Réincarné. Un grand pas en avant, certes, mais vers quelle destinée ? Censé sauver le monde, le jeune homme doit d'abord apprendre à maîtriser le saïdin. Hélas, cette moitié masculine du Pouvoir de l'Unique est une arme à double tranchant. Car elle condamne à la folie et à la mort les hommes à qui elle offre la gloire et la puissance...

Chroniques d'au-delà du seuil T4 : La cité qui grandit-Paul Carta 2016-11-02 Qui est réellement Petit Dieu ? Pour la première fois depuis mille ans, Poménia connaît de nouveau la guerre. La Cité maudite s'est défait de son joug et le temple de Dycots est tombé sous l'assaut de la population. L'heure est grave, la résistance s'organise. Jan et petit Dieu, qui comptent autour d'eux de plus en plus d'adeptes, profitent du passage d'une troupe de comédiens pour s'échapper de la Cité Maudite. Ils s'enfoncent alors dans le désert appelé le Souffle d'Hestiar. Là, des nomades qui les recueillent leur révèlent que les anciens Dieux existent toujours, et que leur culte persiste. Pendant que, dans l'Alphée, le Pentacle appelle à la guerre, Jan et Petit Dieu se dirigent vers Solyncisse, capitale tutélaire du plus puissant des Dieux du Pentacle. Alors que des armées se mettent en marche, tous sont obnubilés par une seule question : qui est réellement Petit Dieu ?

The Anomaly-Michael Rutger 2018-06-19 INDIANA JONES MEETS THE X-FILES IN THIS "TAKE NO PRISONERS' (PRESTON & CHILD) SURVIVAL THRILLER OF A ROGUE ARCHAEOLOGIST TRAPPED IN A GRAND CANYON CAVE THAT'S A CONSPIRACY THEORY COME TO LIFE. Not all secrets are meant to be found. If Indiana Jones lived in the X-Files era, he might bear at least a passing resemblance to Nolan Moore -- a rogue archaeologist hosting a documentary series derisively dismissed by the "real" experts, but beloved of conspiracy theorists. Nolan sets out to retrace the steps of an explorer from 1909 who claimed to have discovered a mysterious cavern high up in the ancient rock of the Grand Canyon. And, for once, he may have actually found what he seeks. Then the trip takes a nasty turn, and the cave begins turning against them in mysterious ways. Nolan's story becomes one of survival against seemingly impossible odds. The only way out is to answer a series of intriguing questions: What is this strange cave? How has it remained hidden for so long? And what secret does it conceal that made its last visitors attempt to seal it forever? ICWIM6-Bernard Jacob 2013-01-29 After Zurich (1995), Lisbon (1998), Orlando (2002), Taipei (2005) and Paris (2008), the International Conference on Weigh-In-Motion (ICWIM6) returns to North America to join with the North American Travel Monitoring Exhibition and Conference (NATMEC 2012). International WIM conferences are organized by the International Society for Weigh-In-Motion (ISWIM). The conference addresses the broad range of technical issues related to weighing sensors and systems, weight data management and quality assurance, enforcement, road operation and infrastructure related issues. It provides access to current research and best practices, in an international forum for WIM technology, standards, research, policy and applications. Heavy vehicle mass monitoring, assessment and enforcement are key actions to ensure road safety and fair competition in freight transport, facilitating the inter-modality, and to design and maintain reliable and durable road infrastructures, with a better compliance of weights and dimensions. WIM is becoming part of a global ITS for heavy traffic management, contributing to reduce the environmental impact of freight transport and to a better use of the existing road networks.

Bran Mak Morn: The Last King-Robert E. Howard 2005-05-31 From Robert E. Howard's fertile imagination sprang some of fiction's greatest heroes, including Conan the Cimmerian, King Kull, and Solomon Kane. But of all Howard's characters, none embodied his creator's brooding temperament more than Bran Mak Morn, the last king of a doomed race. In ages past, the Picts ruled all of Europe. But the descendants of those proud conquerors have sunk into barbarism . . . all save one, Bran Mak Morn, whose bloodline remains unbroken. Threatened by the Celts and the Romans, the Pictish tribes rally under his banner to fight for their very survival, while Bran fights to restore the glory of his race. Lavishly illustrated by award-winning artist Gary Gianni, this collection gathers together all of Howard's published stories and poems featuring Bran Mak Morn-including the eerie masterpiece "Worms of the Earth" and "Kings of the Night," in which sorcery summons Kull the conqueror from out of the depths of time to stand with Bran against the Roman invaders. Also included are previously unpublished stories and fragments, reproductions of manuscripts bearing Howard's handwritten revisions, and much, much more. Special Bonus: a newly discovered adventure by Howard, presented here for the very first time.

New York 2140-Kim Stanley Robinson 2017-03-14 NOMINATED FOR THE HUGO AWARD FOR BEST NOVEL 2018 New York Times bestselling author Kim Stanley Robinson returns with a bold and brilliant vision of New York City in the next century. As the sea levels rose, every street became a canal. Every skyscraper an island. For the residents of one apartment building in Madison Square, however, New York in the year 2140 is far from a drowned city. There is the market trader, who finds opportunities where others find trouble. There is the detective, whose work will never disappear - along with the lawyers, of course. There is the internet star, beloved by millions for her airship adventures, and the building's manager, quietly respected for his attention to detail. Then there are two boys who don't live there, but have no other home - and who are more important to its future than anyone might imagine. Lastly there are the coders, temporary residents on the roof, whose disappearance triggers a sequence of events that threatens the existence of all - and even the long-hidden foundations on which the city rests. New York 2140 is an extraordinary and unforgettable novel, from a writer uniquely qualified to tell the story of its future. For more from Kim Stanley Robinson, check out:

When do fishes become juveniles?-G.H. Copp 1999-09-30 Metamorphosis and the transition from larvae or embryos to juveniles in fishes are important in order to answer, for example, questions about: (1) life-history styles and their modifications in evolutionary perspective and within current environmental demands; (2) the development and application of fisheries recruitment models, (3) the use of ontogenetic scales for interspecific comparisons, (4) the identification of ontogenetic shifts in resource use, and (5) the discovery of evolutionary interrelationships of species or genera. This volume is dedicated to recent studies and reviews of existing knowledge on this insufficiently-addressed area of ichthyology. Most of the papers in this volume were presented in Bratislava, Slovakia, at the 1st International Workshop of the Fish Ontogeny Network of Europe (FONE) in September 1997, a meeting sponsored in part by the European Commission. This volume emphasizes an integrated approach to the study of fish ontogeny, which is a process during which one event is related to another and everything is related to everything else, encompassing physiology, morphology, behaviour and niche. Within this comprehensive perspective, the papers in this volume are grouped along four major themes: reflections on early ontogeny and metamorphosis, organism-environment relationships, ontogeny of predator-prey interactions, and behaviour and ontogeny. Among other issues, the papers consider topics such as whether one can identify when fish metamorphosis ends, whether the larva period begins with hatching or with the onset of exogenous feeding, whether fish ontogeny is 'saltatory' or 'gradual', and whether larvae are eliminated in some fishes with direct development. The keynote paper of this volume reviews the main topics within contemporary paradigms and the final paper concludes that the onset of the juvenile period can be identified in some species, but precision remains problematic, emphasizing the need for further research in this dynamic area of fish biology.
